

SHREEKRUSHNA GAJANAN PATIL

AI / Machine Learning Engineer (Fresher)

Phone: +91-9322372250 — Email: vpatil2752004@gmail.com

LinkedIn: linkedin.com/in/krushna-patil

Professional Summary

AI/ML-focused Computer Engineering undergraduate with hands-on experience in machine learning, data mining, and NLP-based projects. Strong foundation in Python, data preprocessing, feature extraction, and classification models. Experienced in building real-world ML applications, analyzing datasets, and evaluating model performance. Passionate about applying AI techniques to solve practical problems and continuously upskilling in the AI/ML domain.

Technical Skills

Programming & Data: Python, Java, C, C++, NumPy, Pandas, Matplotlib

Machine Learning: Supervised & Unsupervised Learning, Classification, Regression, Feature Engineering, Model Evaluation

Natural Language Processing: Text Preprocessing, Tokenization, Bag of Words (BoW), TF-IDF, Text Classification

Databases & Tools: MySQL, MongoDB, Jupyter Notebook, Git, VS Code

Additional Exposure: REST APIs, Android Development (Basic), Problem Solving, Debugging

Education

Keystone School of Engineering, Pune	2023 – 2026
Bachelor of Engineering – Computer Engineering	

Government Polytechnic, Murtizapur	2020 – 2023
Diploma – Information Technology	Score: 80%

10th Standard	2020
Score: 78.90%	

Projects

Online Terrorism Detector Using Machine Learning (NLP)	Jul 2025 – Dec 2025
---	---------------------

- Developed an NLP-based machine learning system to identify terrorism-related content from online text.
- Performed data preprocessing, text cleaning, tokenization, and feature extraction using TF-IDF.
- Implemented classification algorithms to detect suspicious content.
- Evaluated model performance using accuracy and other evaluation metrics.
- Applied AI techniques for real-world content moderation and security systems.

Bus Tracking Application

- Designed a real-time bus tracking system using GPS and database connectivity.
- Implemented backend logic using Java and MySQL.
- Gained experience in data handling, real-time updates, and system integration.

Agriculture Farm Management System

- Developed an Android-based platform connecting farmers directly with customers.
- Managed data storage and retrieval using MySQL.
- Improved understanding of data-driven application design.

Internship Experience

Mountreach Solutions Pvt. Ltd., Amravati Android Development Intern

Jul 2022 – Aug 2022

- Worked on application development and debugging using Android Studio.
- Understood backend connectivity, data flow, and system logic.
- Gained exposure to real-world software development lifecycle and problem-solving.

Publication

Online Terrorism Detector Using Data Mining

Published: 15 Nov 2025

- Research focused on machine learning and NLP techniques for text classification.
- Demonstrated analytical thinking, experimentation, and model evaluation skills.

Certifications

- Industrial Training Certificate – Android Development
- Full Stack Development

Languages

Marathi, Hindi, English
